## WHO AM I

**A 31 year old woman fascinated with statistics and looking for an easy way to accumulate wealth. I have always loved playing numbers and making them tell a story, depending how you use them.**

**I discovered my "love" for football a few years ago when a friend of mine started dating a very famous player.**

**I found a way to combine both of these things when I found out what a scout is.**

# What is a scout ?

**According to Wikipedia, a football  
scout attends football matches on the  
behalf of clubs,  
to collect intelligence**

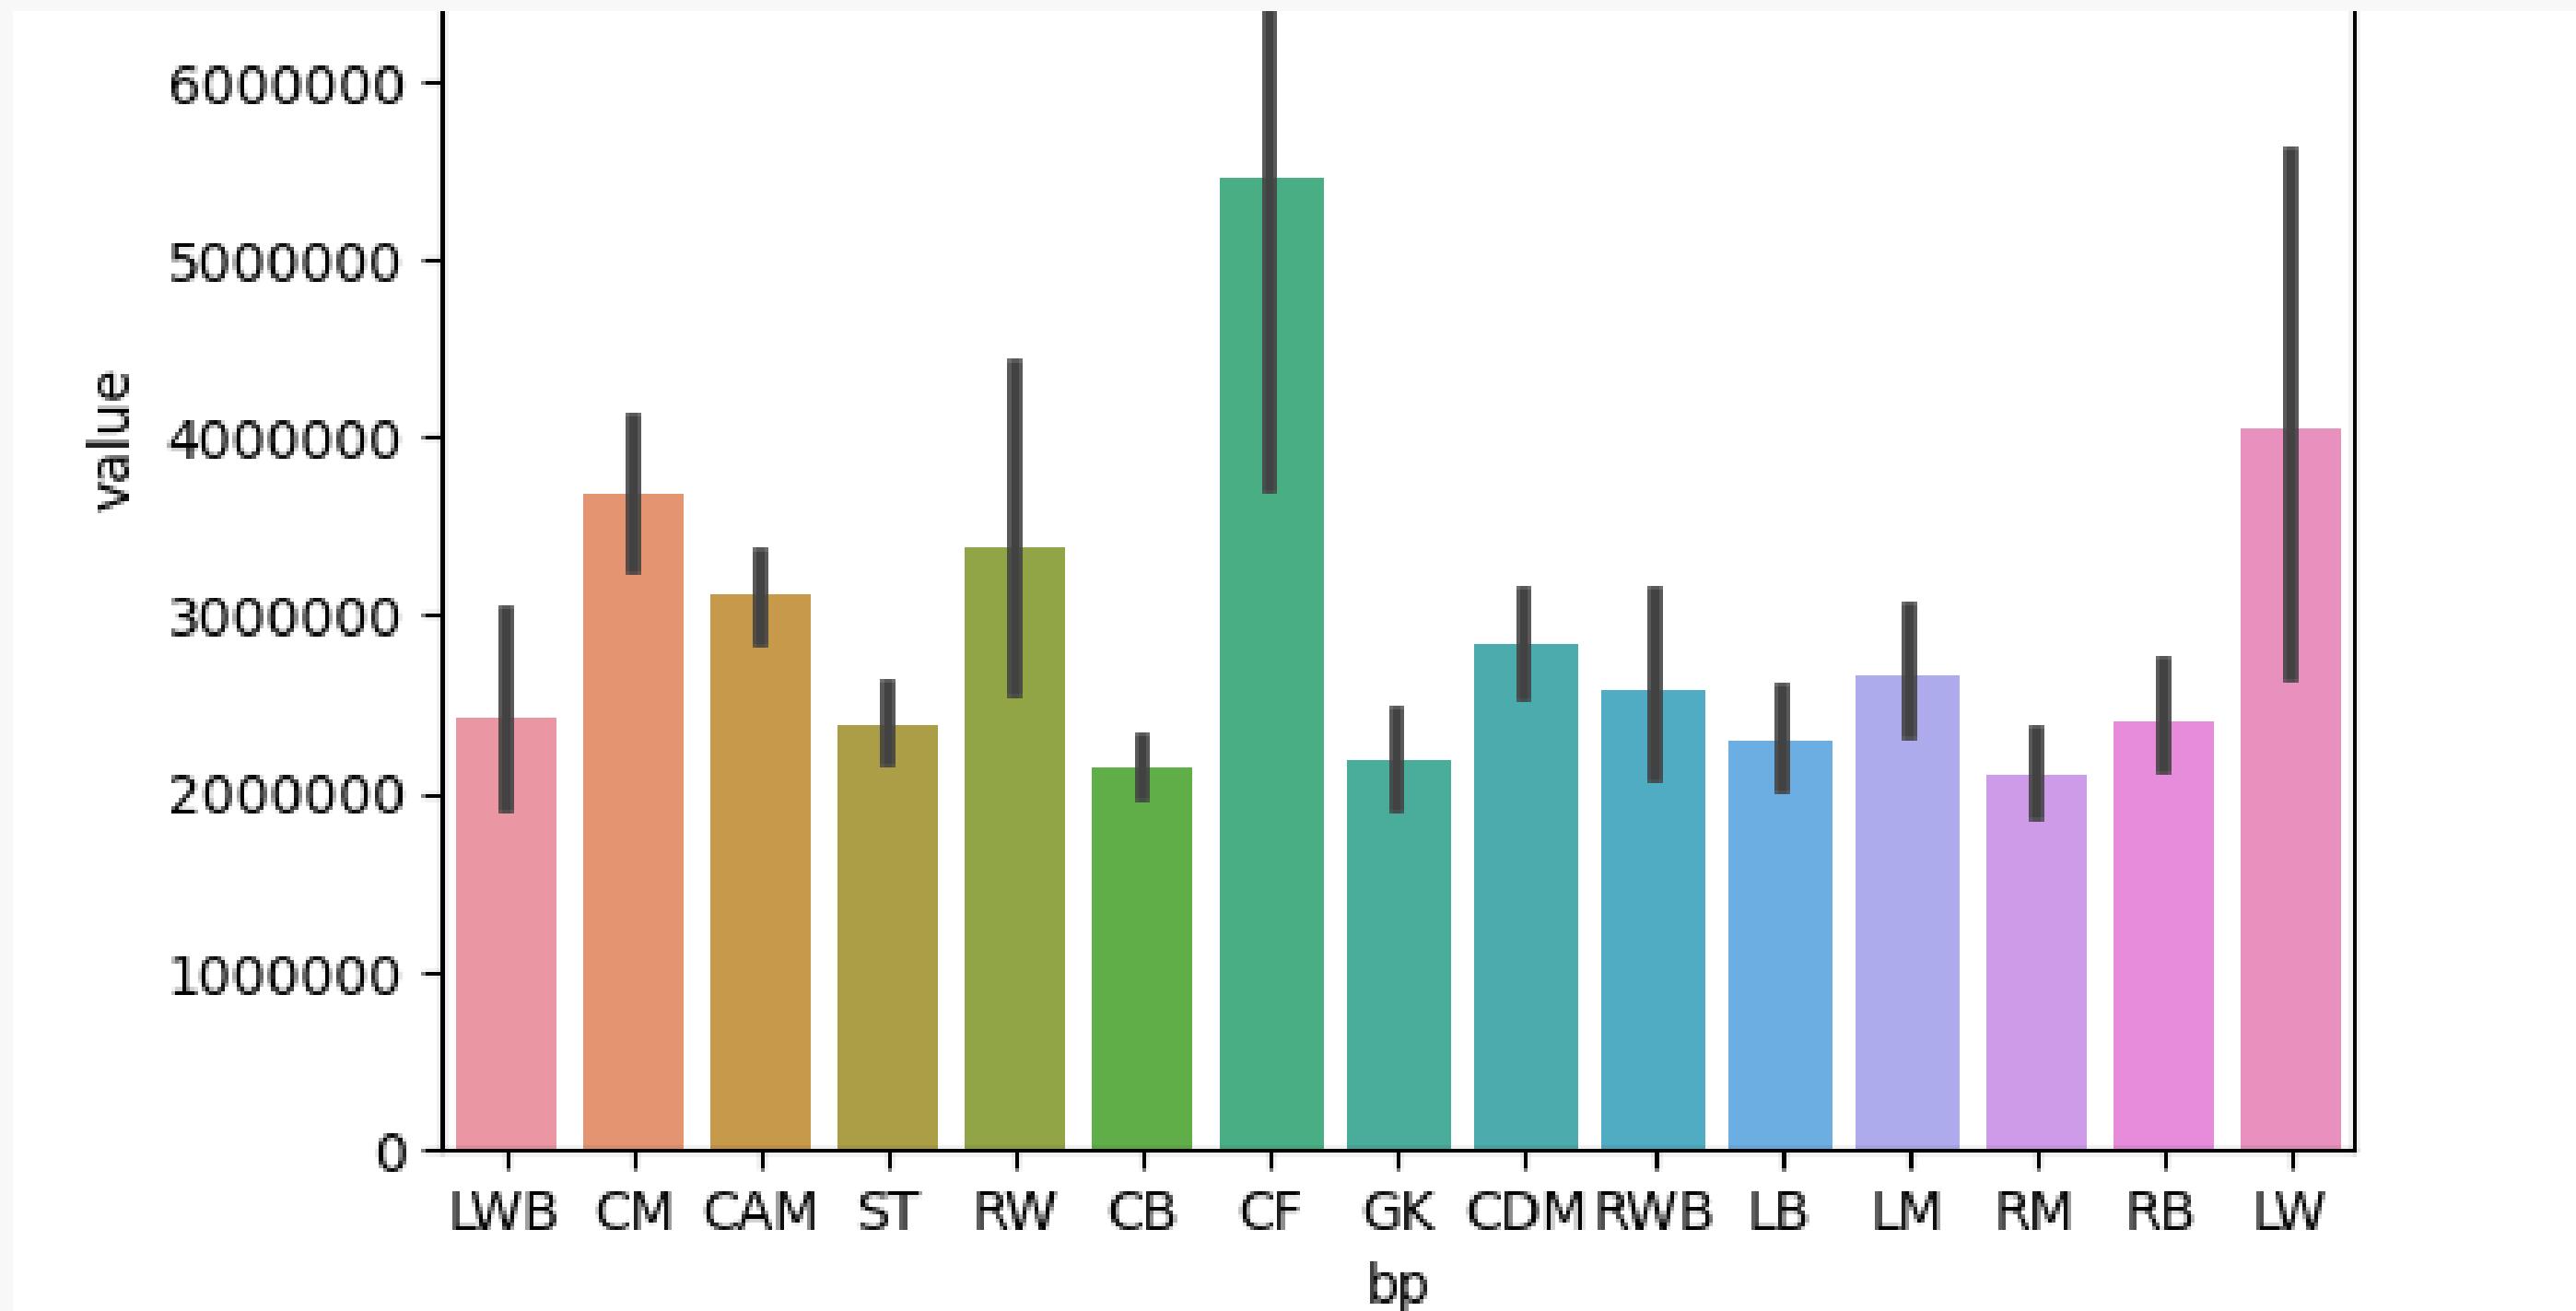

---

# **How to use my tool**

**This can be used with any data set that you will collect. You will have to upload your file and then follow my exact script to automatically find the best players dependig on their position or any other attributes at any given time as long as you have their details.**

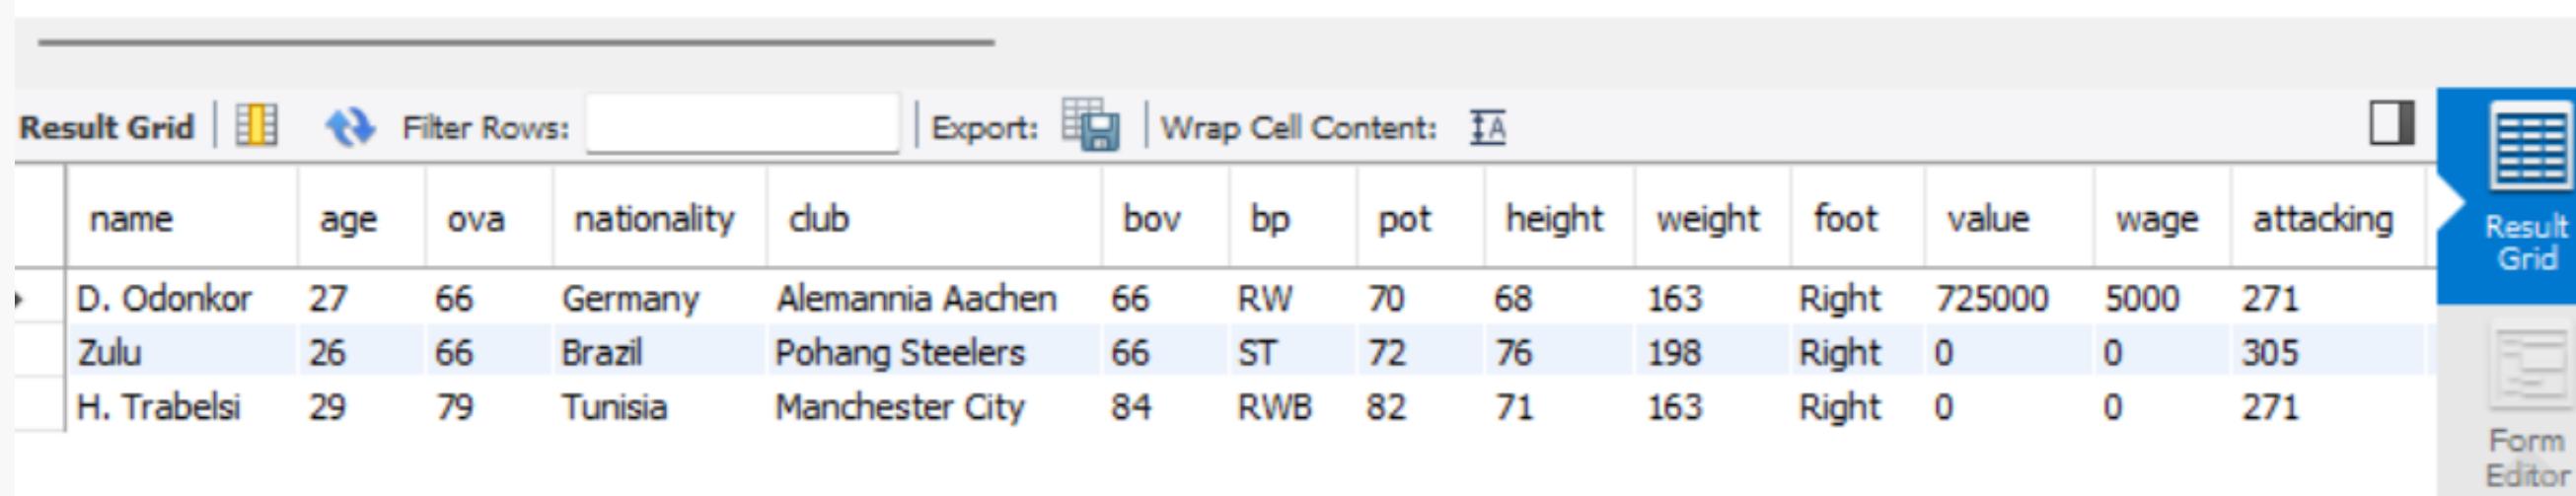

**Unfortunately, it won't be able to predict any outcomes for the moment. I am currently pursuing a more detailed a data course and if you buy my tool, you will help me finance it and improve it so please support me !**

# Example of most valuable players according to their position from a 2019 data set with Python

# List of players above 30 ranked by their value

```
3 •   SELECT * FROM fifa
4     WHERE age < 30
5     ORDER BY value
6     DESC ;
```

The screenshot shows a database query results grid. At the top, there are buttons for 'Result Grid' (selected), 'Form Editor', 'Filter Rows:', 'Export:', and 'Wrap Cell Content:'. The results grid displays player data with the following columns: name, age, ova, nationality, club, bov, bp, pot, height, weight, foot, value, wage, and attacking. The data for three players is shown:

	name	age	ova	nationality	club	bov	bp	pot	height	weight	foot	value	wage	attacking
▶	D. Odonkor	27	66	Germany	Alemannia Aachen	66	RW	70	68	163	Right	725000	5000	271
▶	Zulu	26	66	Brazil	Pohang Steelers	66	ST	72	76	198	Right	0	0	305
▶	H. Trabelsi	29	79	Tunisia	Manchester City	84	RWB	82	71	163	Right	0	0	271
